Dear Examiner Nguyen:

Attached please find the source code modules referenced in the tables on page 3-4 of the response, and highlighted on the directory listings, submitted on 10/18/04. A compressed file is also available with all of the modules, retaining their original directory structure and datecodes. Please let me know if you would like to review this file.

It is my understanding that these are the same code modules included in the code appendix of the parent patent application, and the attributed dates in the directory listings are also true and accurate, i.e., all prior to March 19, 1996.

The original "ZIP" disk remains available for forensic analysis, should this be required.

Very truly yours,

/Steven M. Hoffberg/
